

SUSTAINABLY GROWING

FROM FARM TO FACILITY

Our farming follows the sun, and this seasonal rotation allows **our 8 farms to recharge naturally.**

We're focused on an **improved soil structure** with higher microbial activity.

We've **reduced chemical usage on our farms by over 50%** in the past 10 years.

All of our waterbeds have a recirculation system which creates **net zero water waste.**

Our use of drones **reduced water usage** from 30 gallons per acre to 2 gallons per acre.

Our product **wash water is treated with peroxy acetic acid**, which breaks down into CO₂ and water.

All B&W product bags are **formed from recycled materials and are recyclable.**

All B&W **shipping boxes are recyclable.**

All of our **outdoor lights are now LED** and we're in the process of bringing the energy saving indoors.

Print and paper materials have been severely reduced by **switching to digital materials** such as digital PDFs, emails, QR codes, and more!
